

The background of the entire image is a dark gray, almost black, architectural drawing. It features a complex network of white lines representing building footprints, streets, and possibly utility lines, creating a technical, blueprint-like texture.

JIMECA

the hook lift makers

JIMECA: The Hooklift Makers

- Founded in 1985, with 800m² and 7 partners as employees.
- 2013: 86.000m², 200 employees and more than 23.000 units manufactured for customers in Europe, LatinAmerica and Africa.
- Success based upon:
 - Quality and competitiveness: due to highly robotized manufacturing process.
 - R&D: Continuous adapting to new products & features.
 - Flexibility: To accomplish with our customers' needs.

QUALITY & COST

- Highly specialized manufacturing process.
- Well trained and experienced staff.
- Using the latest robotic technologies and the best materials, we are able to offer high quality products at very competitive prices.

QUALITY & COST

- We have designed and developed our own products lines, carefully choosing the best technologies to optimize the production process.
- Thanks to our experienced staff, after producing +23.000 units for different industries, we are able to modify and adapt our products to customer needs.
- UNE - EN ISO 9.001-2008 Quality program.
