

JIMECA

the hook lift makers

Only JIMECA offers a comprehensive solution for your needs.

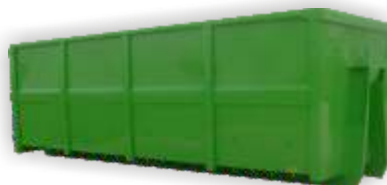

Our drive has led us to develop a thriving industry based on the creation of our own designs, patented in the Spanish Official Industrial Property Gazette and which covers loading and unloading weighing devices in containers and industrial vehicles, all products we focus on.

Waste-gardening containers

The manufacturing of our products caters for the needs of our hooklifts. Within our range we can recommend our closed containers, truck bodies, containers and waste-gardening containers, which are the ones described.

The type and thickness of the steel sheet used in the manufacturing of the waste-gardening containers is smooth and 3mm thick, with a quality SQ75GR.

The load volume will depend on the chosen model: 3.000 kg, 8.000kg, 10.000 kg, 12.000 kg, 14.000 kg, 16.000 kg, 20.000 kg, 25.000 kg and 30.000 kg.
